Relax Massage

This is our relaxing massage using long slow flowing strokes to help move energy, de-stress your mind and loosen up your body.

Therapeutic Massage (Classic Swedish)

This massage of effleurage, petrissage, kneading, friction and percussion helps restore normal mobilization to soft tissue (muscle, fascia) increasing circulation, relaxing superficial muscles, reducing stress and relieving pain. Extra focus on specific area may take time away from full body 50 minute.

Deep Tissue

This massage uses firm pressure and slow strokes to reach deep layers of muscle and fascia. This can help to break down “knots” and break up scar tissue. This is usually for chronic pain and specific areas of tightness. We focus on 2 specific areas of the body for 50 minute session.

Spa Stone

Warm basalt stones and aromatherapy oils melts away stress and muscle aches.

Sports Massage

This massage is specific to the overused muscle usually by athletic clients. Therapists will use a few different modalities and stretching on all or specific muscles to break down tension or adhesions and separate layers of connective tissue to release tightness and restore muscles to normal length and range of motion.

Couples Massage

Relax or Therapeutic Massage in a room for two.

Pre-Natal Massage

Let our therapists ease your most affected areas of aches and pains while relaxing mommy and baby.

Tandem Massage

Two therapists perform a rhythmic simultaneous, relaxing massage. The ultimate indulgence! For the modest, draping during the massage is minimal. *Limited Availability

Reflexology

Application of thumb pressure to reflex points in the feet which correlate to specific organs in the body. Relax, rejuvenate, and rebalance meridians and cleanse energy points in the body.
